

# .404" Harvester Sprockets

**BALANCED. SOLID. DURABLE.**

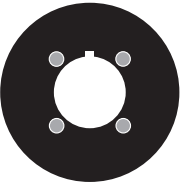

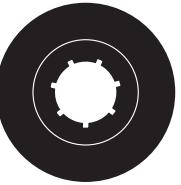

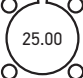

The world of timber harvesting professionals demands durability and uptime. Our new rim-style drive sprockets have features to improve efficiency and are made from high-strength alloy steel for increased durability and long life.

Designed for .404" pitch chains, these sprockets are available in a variety of tooth configurations and drive shaft sizes to fit many models of mechanized harvesters.

- + Precision-balanced sprocket is machined from durable solid-billet steel
- + Designed to reduce chain stretch with raised-tooth design and precision match to Oregon .404" chains
- + Engineered to improve debris ejection with tapered clean-out side-ports
